

Senqu Bridge – Engineering Brilliance Across the Mountains

Alongside His Majesty's Award, Lesotho's pride in the Lesotho Highlands Water Project continues to grow. On October 21 2025, the LHDA marked another historic milestone, the completion of the deck construction of the Senqu Bridge.

This achievement was made possible through the dedication, skill, and teamwork of engineers, technicians, and workers who assembled the structure piece by piece. Every pier, bolt, and beam tells a story of resilience and innovation.

The Senqu Bridge, a key feature of LHWP Phase II, stands as a symbol of collaboration and engineering excellence. It connects more than just land it connects people, communities, and nations.

As we look toward the 40th anniversary of the LHWP, we celebrate this engineering triumph with pride and gratitude. The transformation of our highlands continues to shape a stronger, more connected future for Lesotho.

Engineering brilliance, stitched into the heart of our mountains.
