

UN SECRETARY GENERAL VISITS KATSE DAM: A HISTORIC MOMENT FOR LESOTHO AND THE LHWP

In an event that will remain etched in the history of the Lesotho Highlands Water Project (LHWP) and the Kingdom of Lesotho. We were privileged to host His Excellency António Guterres, Secretary General of the United Nations, at the iconic Katse Dam.

His Excellency was accompanied by the Honourable Minister of Natural Resources, Mr. Mohlomi Moleko, and the Honourable Minister of Foreign Affairs, Mr. LejoneMpotjoane. During the visit, the Secretary General received an in-depth briefing on the LHWP, led by the LHDA Chairman of the Board of Directors, while touring the dam.

The LHWP stands as a testament to the strength of regional and transboundary partnerships, and we are deeply honoured to receive recognition and support from the United Nations. This visit underscores the global significance of our work and the alignment of the LHWP with the principles of sustainable development and international cooperation.

As the implementing agency of this groundbreaking project, the LHDA is steadfast in its commitment to advancing several Sustainable Development Goals (SDGs). Our initiatives continue to focus on driving renewable energy solutions, fostering sustainable economic growth, and ensuring that both Lesotho and the region move towards a cleaner, greener future.

We extend our gratitude to the UN Secretary General for his visit, which reinforces the importance of collaboration in building resilient and sustainable economies.
